PROFESSIONAL SUMMARY

Result-driven Business Intelligence and Data Analyst equipped with a solid foundation in SQL database design, Python automation, and enterprise BI reporting. Proficient in transforming raw operational datasets into optimized tracking models and interactive Key Performance Indicator (KPI) dashboards that maximize corporate decision-making efficiency. Highly skilled in predictive analytics, relational modeling, and large-scale data cleansing workflows, with a proven ability to deliver technical flourishes that reduce query latency and boost enterprise process productivity.

CORE COMPETENCIES & TECHNICAL SKILLS

Database Systems:	SQL, Query Optimization, Stored Procedures, Indexing, Data Modeling, MongoDB
BI Reporting:	Power BI (Advanced DAX, Power Query, GUVI Certified), Tableau, Data Studio, KPI Storytelling
Data Engineering:	Python (Pandas, NumPy, Scikit-learn), PySpark (DataFrames, Spark SQL), ETL Pipelines, Excel
AI & Analytics:	Machine Learning, Predictive Analytics, Statistical Interpretation, Generative AI Foundations
Tools & Cloud:	AWS Ecosystem, Git/GitHub, MS Excel (Advanced PivotTables, Macro Analytics)

PROFESSIONAL EXPERIENCE

Data Science Intern

2025

VCodez (Data Science Certification Training)

Chennai, India

- Engineered automated data visualization workflows and extracted complex corporate datasets using SQL and Python, significantly slashing data preprocessing times.
- Collaborated across cross-functional engineering tiers to structure predictive models and scale multi-channel automated pipeline integrations.
- Designed robust visualization systems to track operational KPIs, delivering transparent, actionable trends for corporate business strategies.
- Optimized script computation latency and data-cleaning cycles by applying specialized statistical analytics and data wrangling techniques.

KEY TECHNICAL PROJECTS

Hospital Readmission Prediction System

Python, Machine Learning, Flask, SQL

Data Science Portfolio Initiative | [GitHub Repository](#)

2025

- Processed and structured UCI's Diabetes 130-US Hospitals database comprising thousands of historical medical records and multi-class target labels.
- Executed advanced data cleaning, addressed data gaps, and engineered strategic target indicators to optimize core classifier performance.
- Trained and optimized Logistic Regression, Random Forest, and XGBoost models; benchmarked outputs using precision-recall metrics.
- Deployed a high-performance Flask web infrastructure, yielding localized web forms for immediate real-time risk predictions.

IT Expenditure Analysis Dashboard

Power BI, Power Query, Advanced DAX

Enterprise BI Analytics Initiative | [GitHub Repository](#)

2026

- Extracted, cleansed, and modeled complex financial data using Power Query, establishing a high-performance star schema to manage organizational IT assets and cost centers.
- Formulated advanced DAX expressions (Time Intelligence functions, dynamic rankings) to evaluate historical variance budgets and track operational spend patterns across hardware, software licenses, and personnel segments.
- Engineered fully interactive multi-page dashboards featuring real-time KPI alerts, enabling global business stakeholders to isolate budget overruns instantly and implement proactive expenditure controls.

Customer Churn Prediction System

Python, Scikit-Learn, Pandas, NumPy

Predictive Analytics Initiative | [GitHub Repository](#)

2025

- Analyzed a consumer behavioral dataset using Python to isolate key demographic and transactional metrics driving account cancellations.
- Executed comprehensive exploratory data analysis (EDA) and resolved extreme class imbalances using advanced synthetic data sampling workflows.
- Trained, tuned, and optimized multiple predictive classifiers including XGBoost and Random Forest, achieving a high-performance 88% ROC-AUC score.
- Formulated critical preventative action segments, providing business stakeholders with clear, data-backed operational strategies to preserve account tenure.

EDUCATION

Bachelor of Engineering (B.E.) — Computer Science and Engineering

2021 – 2025

M.I.E.T. Engineering College (Affiliated to Anna University) | CGPA: 8.00

Tiruchirappalli, Tamil Nadu

PROFESSIONAL CERTIFICATIONS

- Advanced Data Visualization using Power BI & Web Scraping and Data Wrangling — **GUVI Geek Network**
- Data Science Certification Training — **VCodez**
- Data Science and Machine Learning Masterclass — **Qspiders**
